

MAHABOOB ALI SHAIK

Aspiring Software Engineer | Java | Python | Full-Stack Development

Ongole, Andhra Pradesh, India | +91 85009 51212 | mahaboobali12129@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in software development using Java, Python, JavaScript, React, Node.js, SQL, and REST APIs. Experienced in developing full-stack web applications, implementing authentication, integrating APIs, and working with databases. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, and problem-solving. Seeking a Software Engineer internship/role to apply programming and software development skills to build scalable and reliable applications.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Frontend:** React, HTML5, CSS3
- **Backend:** Node.js, REST APIs
- **Databases:** MySQL, MongoDB, DBMS
- **Core CS:** Data Structures & Algorithms, OOP, Operating Systems, Computer Networks
- **Cloud & Security:** AWS, Zero Trust Security, Networking Fundamentals
- **Developer Tools:** Git, GitHub, VS Code, Jupyter Notebook

PROJECTS

AI Mobile Testing Agent — Autonomous Multi-Device Android Test Automation

Python, Streamlit, Gemini API, ADB | [GitHub: Link](#) | [Live Demo: Link](#)

- Built an autonomous, AI-powered multi-device Android test automation platform that converts plain-English test scenarios into deterministic, reusable Python test scripts.
- Designed a multi-device orchestration engine to coordinate and synchronize actions across multiple physical devices/emulators via ADB.
- Implemented an isolated sandbox test runner with screenshot, logcat, and UI-hierarchy artifact capture, plus AI-driven failure diagnostics and interactive HTML reporting.
- Built a Streamlit web dashboard and CLI for authoring, executing, and re-running saved test suites, integrating the Gemini API for natural-language-to-code generation.

Customer Churn Prediction System

Python, Pandas, Scikit-learn | [GitHub: Link](#) | [Live Demo: Link](#)

- Developed a machine learning application to predict customer churn using a dataset containing 7,000+ customer records.
- Implemented data preprocessing, missing-value handling, categorical encoding, and feature scaling using Python and Pandas.
- Built and evaluated a supervised classification model using Scikit-learn to identify customers at risk of churn.
- Identified key churn factors including contract type, tenure, monthly charges, and payment method.

EXPERIENCE

Smart Bridge Internship — Subscription Waste Detector

Jun 2026 – Aug 2026

- Developed a Subscription Waste Detector application to identify and flag unused or redundant subscriptions based on usage patterns.
- Applied **AI concepts and data-driven analysis** to identify subscription usage patterns and support waste-reduction decisions.
- Explored **AI applications in the BFSI domain**, focusing on practical industry use cases and problem-solving.

Zero Trust Cloud Security & Networking Virtual Internship — Zscaler

Apr 2026 – Jun 2026

- Gained hands-on understanding of networking fundamentals and Zero Trust security concepts, including authentication, access control, and secure cloud connectivity.
- Explored **Zero Trust architecture and cloud security concepts** for protecting users, applications, and network resources.
- Applied concepts of **least-privilege access, identity-based security, and continuous verification** to understand modern network security.

Smart Bridge Internship — Sustainable Smart City

May 2025 – Jul 2025

- Built a data-driven forecasting application using Python to predict temperature, humidity, and rainfall for a given location.
- Applied **data analysis and forecasting techniques** to process environmental data and generate predictions.
- Designed the application to support **data-driven insights for sustainable smart-city planning**.

EDUCATION

B. Tech in Computer Science Engineering — RGM CET, CGPA: 8.4/10

Expected 2027

Intermediate (MPC) — Hyderabad Institute of Excellence, Vikarabad — 93.5%

Secondary School (SSC) — Narayana E-Techno High School, Kandukur — 100%

CERTIFICATIONS

- AWS Certified Cloud Practitioner | Amazon Web Services (AWS) | [\[View Certificate\]](#)
- MongoDB Associate Developer Certification | MongoDB | [\[View Certificate\]](#)
- Microsoft Security Essentials Professional Certificate | Microsoft & LinkedIn | [\[View Certificate\]](#)

LEADERSHIP & ACTIVITIES

- Participated in hackathons, coding events, and technical workshops, developing software solutions and collaborating on technical projects.
- Core strengths: Problem Solving, Analytical Thinking, Team Collaboration, Communication, and Time Management.
- Languages: English, Telugu, Hindi.
